- **Added:** Added shortcut for Close Window
- **Improvement:** Events Media can now also be delete in the Media View. If Media is linked to one or mode events, and you delete that Media, everything is cleanup in the events.

## **B. Known bugs or limitations in v1.1**

### **1. Date formats that currently are not converted**

- Some date formats in GEDCOM are not interpreted and can give an incorrect date interpretation. Know items are:
  - 1947/8 → range ... 1947/52 → range
  - BC, B.C., BCE, B.C.E.
  - ?

### **2. Name's or places with special characters can give problems**

- Not supported characters in names and places are:  
=, &, %, return

### **3. GEDCOM import and Merge**

- MyBlood currently doesn't allow you to import an additional GEDCOM file into the open file.
- Merging data in MyBlood is not yet supported.

### **4. Dates**

- Currently only support for the Gregorian Calendar
